EXPERIENCE

Machine Learning & NLP Intern
Nouvelair
Jul 2026 - Aug 2026

- Designed **MailGuard**, a phishing and fraudulent-domain detection system combining 5 specialized models: domain impersonation, domain age, links, text content, SPF/DKIM/DMARC authentication
- Trained and compared CANINE, BERT, Gradient Boosting, Random Forest and e5 + logistic regression, with leakage-free data splits and thresholds set on validation data (≤ 2% false positives)
- Developed a hybrid, explainable fusion layer (safe rules + logistic regression): **83.5%** of 2026 phishing emails detected at **1.3%** false positives (AUC 0.982), +24 points over the best single signal
- Delivered a Python module that classifies an email in ≈ 4 s with the reasons for each decision, plus a Streamlit interface

AI Automation Intern
JustRent (Boulogne-Billancourt, remote)
Jun 2025 - Aug 2025

- Designed and deployed an AI chatbot (React, Node.js/Express, OpenAI API, OpenWebUI) embedded in the company's WordPress site
- Automated the generation of rental reports (ERPNext, Stripe, LLMs) with n8n, through to emailing them to the tenant
- Delivered in 3 Scrum sprints; deployed with Docker Compose and Coolify

End-of-Studies Project Intern (PFE)
Digital Market
Jan 2024 - May 2024

- Designed a biometric time clock (ESP32, DY50 fingerprint sensor) coupled with a web application for attendance management
- Developed the platform with React, Node.js and MongoDB, with real-time updates via WebSockets

PROJECTS

NeuroPredict MS: AI-assisted MRI follow-up of multiple sclerosis
ESPRIM, team of 6

- ResNet-50 transfer learning (multiple sclerosis vs. healthy subjects): **98.75%** accuracy, 97.45% sensitivity
- Double-head U-Net (Focal Tversky + BCE loss) predicting regions of future lesions: **Dice 82.15%** on MSSEG-2 (40 patients)
- Companion web platform (React, FastAPI)

EDUCATION

Engineering Degree in Data Science and AI
ESPRIM - Private Higher School of Engineering of Monastir
Oct 2024 - 2027 · Ranked 2nd in the 4th-year class, with honors (2025-2026)

Bachelor's Degree in Software Engineering
ISIMa - Higher Institute of Computer Science of Mahdia
Sep 2021 - Jun 2024

Baccalaureate in Mathematics
Lycée Bourguiba

PROFILE

Final-year engineering student in Data Science and AI at ESPRIM (ranked 2nd in the 4th-year class, with honors). Three internships (ML, NLP, AI automation, web development) and two end-to-end projects: MailGuard (phishing detection, 83.5% detection at 1.3% false positives) and NeuroPredict MS (MRI, Dice 82%). Available from February 2027 for a 3 to 6-month end-of-studies internship in ML, NLP and generative AI, in Tunisia or abroad.

SKILLS

Languages
Python, SQL, JavaScript, Java, C#

Machine Learning & Deep Learning
PyTorch, TensorFlow, Scikit-learn, Gradient Boosting, CNN, ResNet, U-Net, autoencoders

NLP & Generative AI
Hugging Face Transformers (BERT, DistilBERT, XLM-R, CANINE), embeddings (e5), OpenAI API, LLMs

MLOps
MLflow, Docker, FastAPI, Streamlit, Git / GitHub, n8n

Cloud & Deployment
Google Colab (GPU T4), Docker Compose, Coolify

Data
Pandas, NumPy, Spark (SQL, Streaming), MySQL, MongoDB, Power BI

Web
React, Node.js / Express, ASP.NET Core, WordPress

Methods
Agile / Scrum, CRISP-DM, UML

CERTIFICATIONS

- NVIDIA: Fundamentals of Deep Learning (Jan 2026)
- Microsoft Learn: Power BI, data preparation, semantic model and reports (Apr 2026)
- Scrum Master introduction, 12 h (Dec 2022)

ACTIVITIES

- Head of Chapter, Elite Council
- General Secretary, Development Club, ESPRIM
- Member, IEEE

LANGUAGES

Arabic	Native
French	Fluent
English	Upper-intermediate (B2)
